

Latest developments in additive technology

Wednesday
29th March 2017
at the AMRC KTC

Additive technologies have been heavily discussed over the last number of years, but how established are they as a manufacturing technology for real parts?

How many additive parts are flying now, and what proportion might this rise to in the future? What are the current challenges for the technology and materials? How do we optimise component design to take maximum benefit from the technology?

Join us at the AMRC Forum on 29th March 2017 to hear views from Boeing, Renishaw, AMRC National Metals Technology Centre, LPW Technology and PES Performance Engineered Solutions.

Event and booking details

Where: The AMRC Knowledge Transfer Centre (KTC), Advanced Manufacturing Research Centre, Brunel Way, Catcliffe, S60 5WG.

When: 09:30 to 13:00 (including lunch) on Wednesday 29th March 2017.

To book your place please contact:
