Opportunities and challenges in the automotive sector

The automotive sector faces significant technological changes in the coming years such as:

- lightweighting
- the increase in electric vehicles and the reduction in the demand for internal combustion engines
- the development of connected autonomous vehicles (self-driving cars)
- digital manufacturing

These developments will have significant implications for manufacturing technologies and the supply chain.

The AMRC Forum will host industry experts as well as small and large companies who have embraced new technology to exploit opportunities.

Speakers from:
- Ricardo
- Jaguar Land Rover
- Tinsley Bridge
- SW Machines
- AMRC
